Serve**

JM Pay
Ticketless Parking
Management System

We are excited to announce the launch of our latest solution -

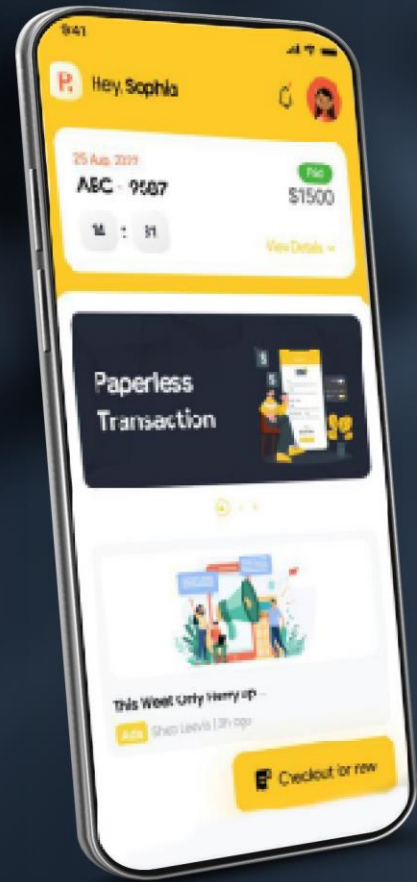

the JMPAY mobile application for ticketless parking management. The new app will enable customers to pay their parking fees quickly and conveniently from their mobile devices without the need for physical tickets.

Our JMSS ticketless parking management system, combined with the mobile app, is a highly innovative, fast, reliable, and scalable automated solution. Beyond the app, we also offer other parking fee payment options such as face recognition, RFID, machines, and cash for our customers' convenience.

It provides an intuitive and seamless experience for customers and gives parking lot operators the tools they need to manage their operations more efficiently.

Our parking management system is versatile and can be customized to manage and automate parking areas in airports, shopping malls, open area pay parking, and manage access for staff, among other options. Our automated parking management system will help optimize resources and drive revenue by streamlining processes and enhancing the customer experience.

With our solution, you'll have access to valuable data insights that will help you make data-driven decisions and streamline operations, thus bringing more value and effectiveness to your business.

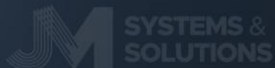

Go Green with Paperless Parking and Access Management using JM Pay.

Revolutionize Parking Management with our Cutting-Edge Solution for Airports, Malls, and Offices

11

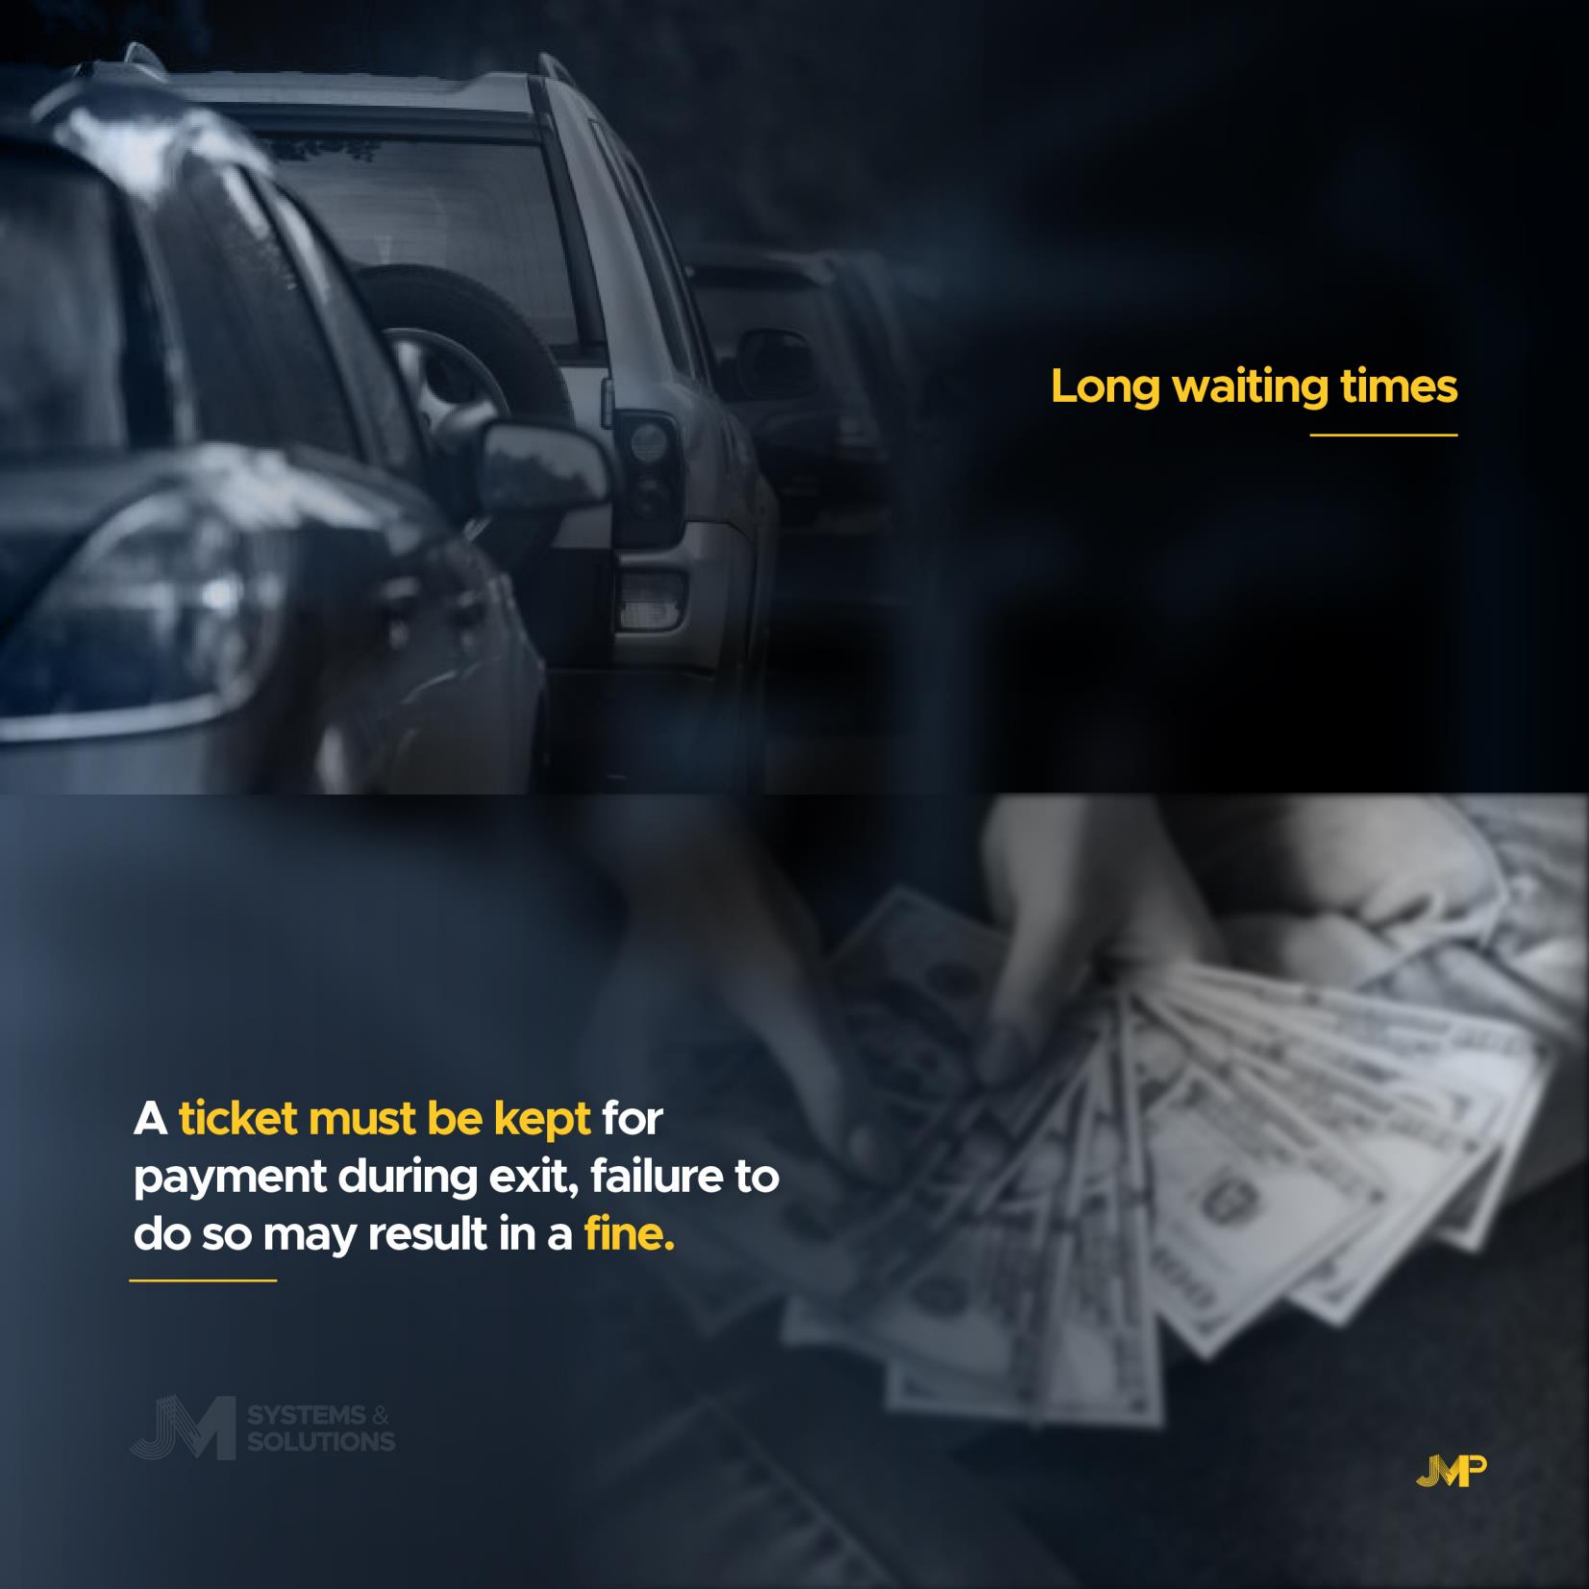

We will provide an advanced dashboard with an enhanced view of all parking transactions and with a feature to process the parking fee payment.

The existing system functions
based on tickets.

End to End process
is a time-consuming

Long waiting times

A **ticket must be kept** for payment during exit, failure to do so may result in a **fine**.

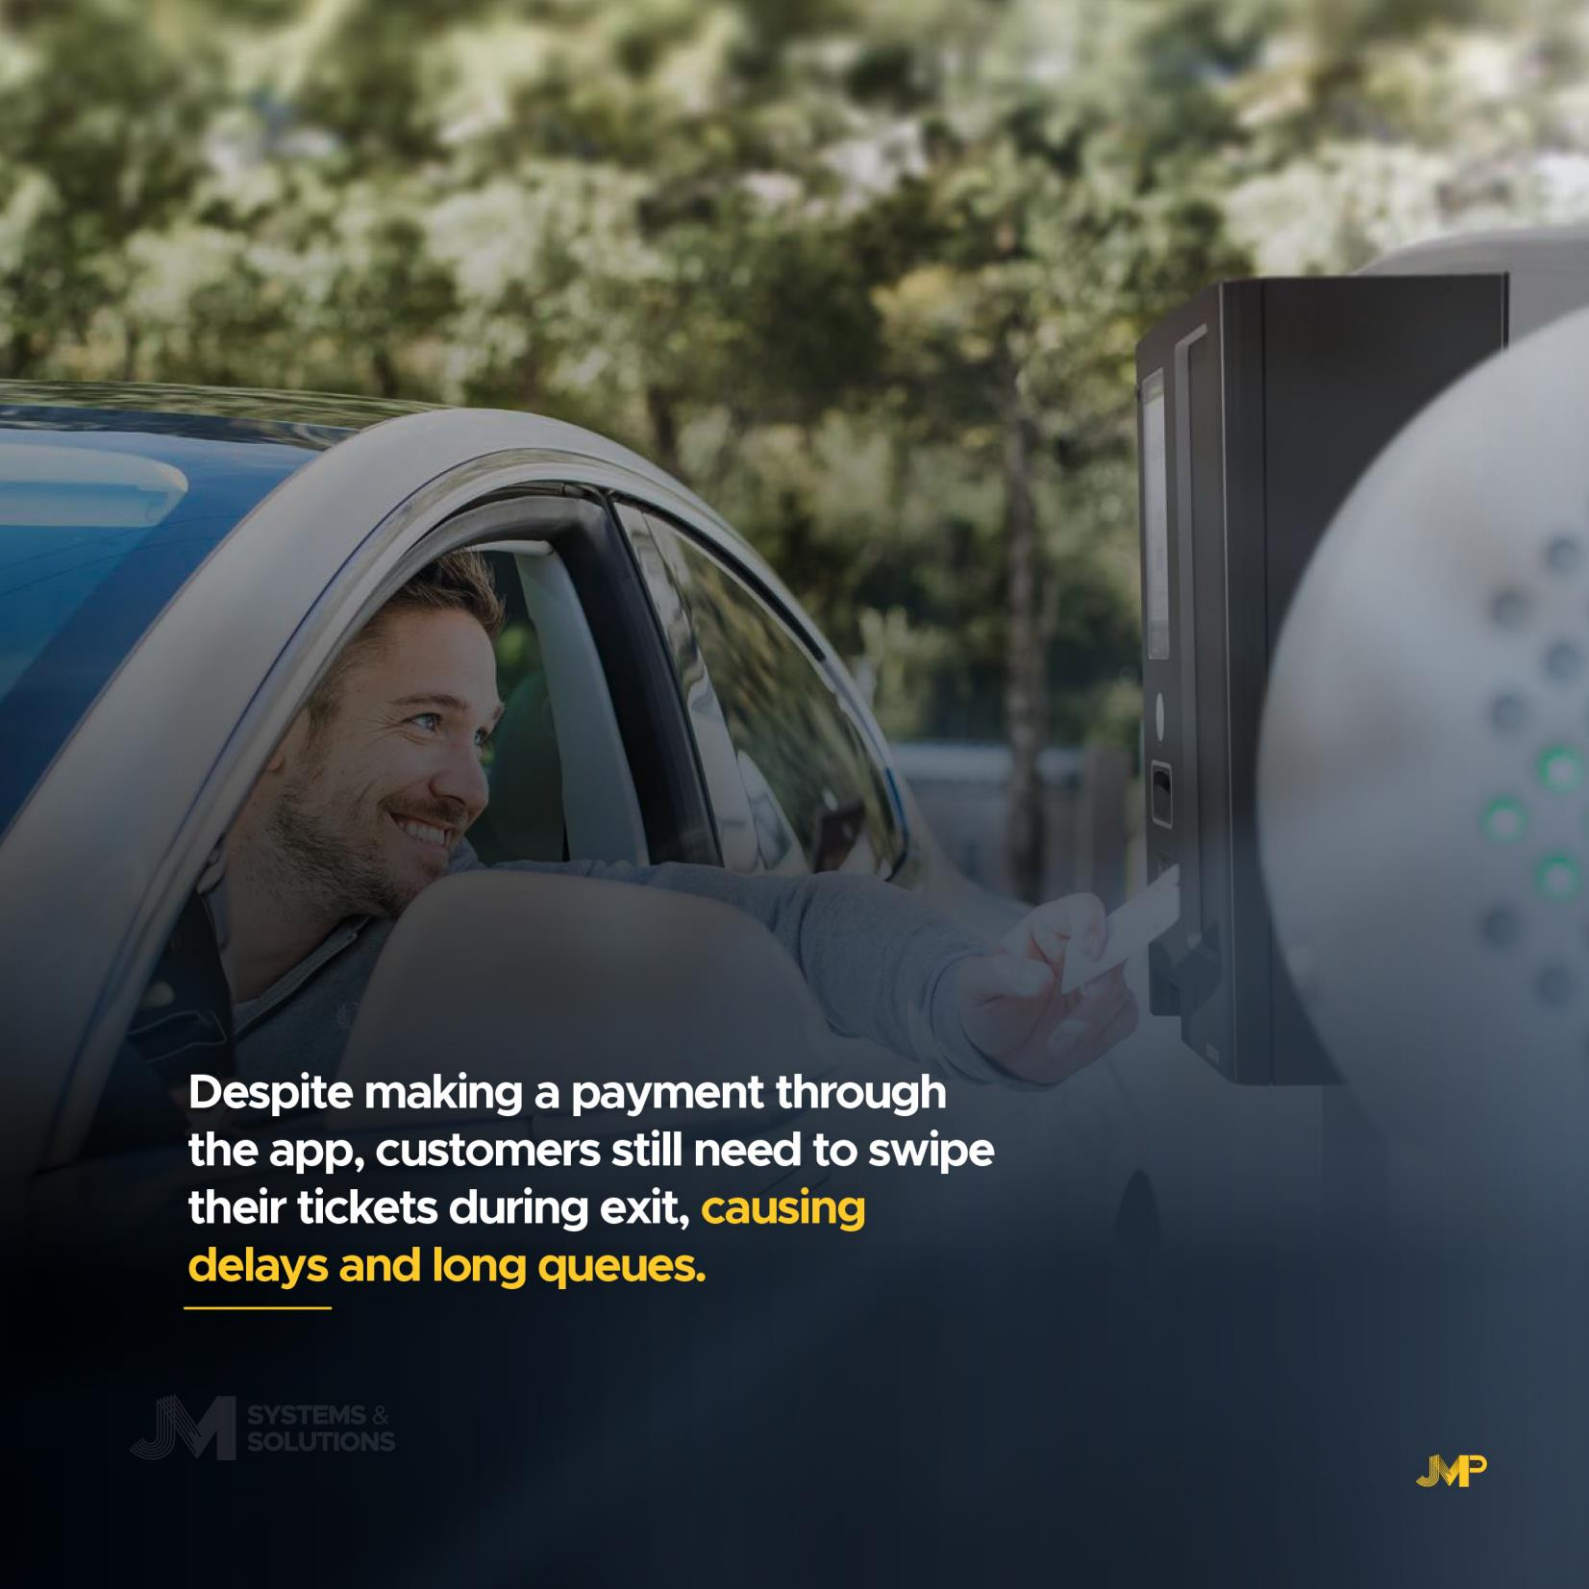

Payment using tickets is
time-consuming and Manual

The availability of a fully
automated parking system is lacking

Customers have limited payment options while parking, including the use of **machines or counters, or ticket-based payment through certain Apps.**

A man with a beard and mustache, wearing a grey long-sleeved shirt, is sitting in the driver's seat of a blue car. He is smiling and looking out the window while holding a white parking ticket. He is using the ticket to interact with a black parking machine. The machine has a screen and a slot for the ticket. The background shows green trees and a clear sky.

Despite making a payment through the app, customers still need to swipe their tickets during exit, **causing delays and long queues.**

Confirmations are not displayed in machines adequately during card payment using ticket
